Plugin	**Contact Form 7**	5.3.1	plugin files (?ver=)
Plugin	**Yoast SEO**	20.1	comment in the HTML code
JavaScript library	**jQuery**	1.12.4	library file (?ver=)
Database	**MySQL**	8.0.28	port 3306
Remote access	**OpenSSH**	8.9p1	port 22
HTTPS certificate	**Let's Encrypt**	–	valid until 20 Jan 2027
Analytics	**Google Analytics 4**	–	script in the page
Newsletter	**Mailchimp**	–	sign-up form

SAMPLE · FICTITIOUS DATA

02 Worth a closer look

- Several components show older versions, including WordPress, PHP and jQuery.
- The server publicly declares the names and versions of the software it uses.
- Besides the main site, a test site (staging) answers and is visible to anyone.

The next step: Essential

The status of every version, the known flaws (CVE) that may apply and what to update first, in a report of a few pages. From €599, delivered in 3–5 business days.
